Smart Habit Tracker

Created By: Nand Kapatel & Srushti Chavan

Date: April 20, 2025

This project is a Smart Habit Tracker developed using Java Spring Boot and Thymeleaf. It allows users to create, manage, and track their daily habits through a user-friendly dashboard.
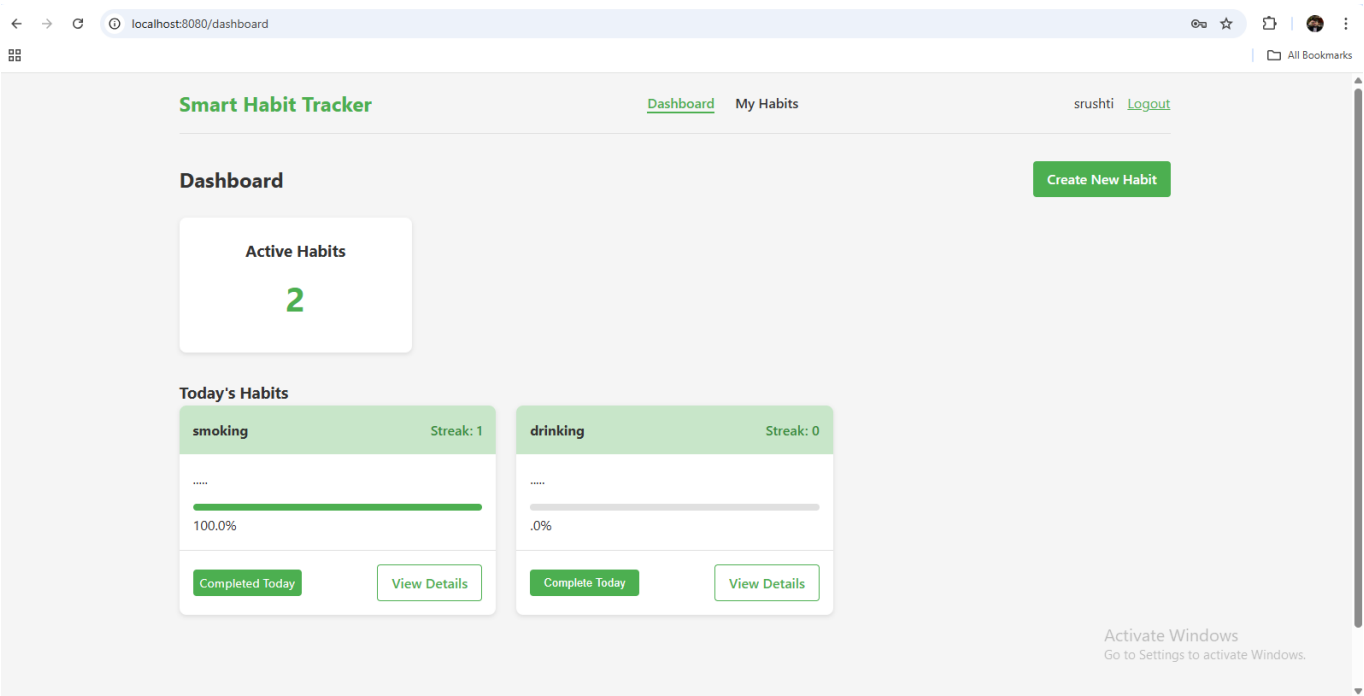

Project Overview

The Smart Habit Tracker app provides a platform for users to:

- Register and log in to their account

- Create and track personal habits

- View daily streaks and completion progress

- Update or delete habits anytime

- Visually monitor habit performance on the dashboard
